**Global Transparency:
fighting corruption for a sustainable future.**
Athens, Greece | 30 October - 2 November 2008

Main Outcomes

Discussion of issues around assurance and certification.

- 1) How can you develop a common template for so many areas, large/small companies, countries, etc.?
- 2) The importance of getting small and medium enterprises involved.
- 3) How can companies sign up if competitors do not?
- 4) Are there too many codes and frameworks already?
- 5) It is important to certify the certifiers.
- 6) How do you measure quality of compliance and the political will behind it?
- 7) Above all, leading by example is the key.

Main Outputs

- Distribution at meeting and also by email of consultation draft of assurance framework.
- Distribution of presentations by email.

Recommendations, Follow-up Actions

- Circulation of the consultation draft of the framework to those attending the workshop once the document is issued for public consultation.

Workshop Highlights (including interesting quotes)

The meeting identified that:

1. A framework should cover all cultures and sizes of companies.
2. A policy will not be credible unless you implement it and it is supported by verification.
3. All the certification in the world will not do what leading by example can achieve.
